COVID-19 School Policy Summary May 23, 2021

How School Policy is Derived:

- **Center for Disease Control (CDC)**
  - Recommends

- **State Department of Health (DOH)**
  - May or may not adopt CDC guidance
  - Guidance will vary as level of community spread changes
  - Requires and Recommends

- **New York City Department of Health (NYC DOH)**
  - (Only applies to NY school)
  - May or may not adopt state guidance
  - Requires and Recommends

- **HudsonWay Immersion School**
  - Must comply with NYC DOH (NY) or state DOH (NJ) requirements
  - Generally, will adopt their more conservative recommendations too
  - Establishes uniform policy for both schools. Rationalizes minor policy differences between the two states for administrative simplicity
  - Requires

- **Families at the School**
  - Must comply with school requirements

<tr>
<td>Child has allergy symptoms</td>
<td>If the child has documented seasonal allergies and does not exhibit other COVID-19 symptoms like shortness of breath, fever, loss of taste or sense of smell, etc., the child can remain in school. If other COVID-19 symptoms are present or if the child does not have documented seasonal allergies, the child should not be in school and should get PCR tested.</td>
<td>Immediately if allergy symptoms have been documented. OR With a negative PCR test if exhibiting COVID-19 symptoms.</td>
<td>The allergy must be documented either with a note from the doctor stating that the child has seasonal allergies or on the health form in their file at school signed by a doctor.</td>
</tr>
<tr>
<td>Positive COVID-19 case</td>
<td>Isolate for 10 days from onset of symptoms or date of positive test if asymptomatic.</td>
<td>After 10-day isolation (no test required) as long as- -Fever free for 24 hours without using fever reducing medication -No symptoms or improving symptoms In all cases, monitor symptoms for 4 additional days.</td>
<td>See quarantine guidance below.</td>
</tr>
<tr>
<td>Primary contact (that is, close contact*) of positive COVID-19 case or of someone suspected of having the virus due to COVID-19 symptoms</td>
<td>Suspected COVID-19 case should test ASAP and return to school with negative test. Close contact should quarantine for 10 days from date of exposure if suspected case is positive or has not been tested. If close contact has been</td>
<td>After 10-day quarantine (no test required) as long as- -Fever free for 24 hours without using fever reducing medication -No symptoms or improving symptoms</td>
<td>-Of all the COVID-19 symptoms, the following are considered the most likely to indicate COVID-19: Fever, shortness of Breath, loss of taste or sense of smell, cough -COVID-19 typically presents itself in children as a bad cold or case of the flu, though</td>
</tr>
</tbody>
</table>

- Positive COVID-19 case
- Primary contact (that is, close contact*)
- Suspected COVID-19 case
- If other COVID-19 symptoms
- If not documented seasonal allergies
- If other COVID-19 symptoms
- If asymptomatic
| **Within 6 feet for 10 minutes over a 24 hour period** | fully vaccinated (Note 1) or recovered from laboratory confirmed COVID-19 within the past 90 days and is asymptomatic, no quarantine or test is required. But in all cases, individual should self-monitor for symptoms through day 14. | OR if suspected positive case tests negative |
| **Updated** | | |

| **Secondary Contact (close contact of a primary contact)** | No quarantine or testing is required if asymptomatic. If the child displays COVID-19 symptoms they should not go to school but instead get a PCR test. | With negative PCR test if symptomatic. |
| **Updated** | | -If primary contact tests positive, secondary contacts become primary contacts and need to follow quarantine guidance above for “close contacts” |

| **Domestic travel (note 2) outside the "local area"** | • Get tested 1-3 days before the trip  
• Get a second test 3-5 days after travel, and  
• Stay home and self-quarantine for 7 days after travel.  
• If no second test done, self-quarantine for 10 days  
• Self monitor for 14 days after the trip for COVID-19 symptoms  
If fully vaccinated or recovered from laboratory confirmed COVID-19 within the past 90 days, and asymptomatic no quarantine or test is required. | After quarantine period as long as-  
-Fever free for 24 hours without using fever reducing medication  
- No other Covid-19 symptoms |
| **Non-essential travel is strongly discouraged** | | -Local area for NY = Contiguous states to NY state  
-Local area for NJ = New York, Delaware and Pennsylvania  
### HWIS family member tests positive but has child or sibling in our school

<table>
<thead>
<tr>
<th>Updated</th>
</tr>
</thead>
<tbody>
<tr>
<td>Positive family member isolates for 10 days but child, who becomes a close contact, must quarantine for those 10 days plus an additional 10 days</td>
</tr>
<tr>
<td>See guidance above for positive or close contact cases</td>
</tr>
<tr>
<td>10+10-day quarantine since positive person could be infectious throughout their 10-day isolation and it is not realistic to expect family members to be able to isolate from each other. So close contact’s 10-day quarantine must begin at end of the positive family member’s 10-day isolation period.</td>
</tr>
</tbody>
</table>

### Quarantine Guidance

The requirements to safely quarantine include:

- The individual must not be in public or otherwise leave the quarters that they have identified for their quarantine.
- The individual must be situated in separate quarters with a separate bathroom facility for each family group. Access to a sink with soap, water, and paper towels is necessary. Cleaning supplies (e.g., household cleaning wipes, bleach) must be provided in any shared bathroom.
- The individual must have a way to self-quarantine from household members as soon as a fever or other symptoms develop, in a separate room(s) with a separate door. Given that an exposed person might become ill while sleeping, the exposed person must sleep in a separate bedroom from household members.
- Food must be delivered to the person’s quarters.
- Quarters must have a supply of face masks for individuals to put on if they become symptomatic.
- Garbage must be bagged and left outside for routine pick up. Special handling is not required.
- A system for temperature and symptom monitoring must be implemented to provide assessment in-place for the quarantined persons in their separate quarters.
- Nearby medical facilities must be notified, if the individual begins to experience more than mild symptoms and may require medical assistance.
- The quarters must be secure against unauthorized access.

### Notes:

1. Fully vaccinated means at least 2 weeks have passed since receiving the final dose of your vaccine.
2. For International travel, check the CDC website and contact the school for guidance.
